DTEK Renewables is preparing a draft detailed territory plan for Poltavska WPP

DTEK Renewables continues to gradually prepare the DTEK Poltavska wind power plant project for implementation, the approximate project capacity of the wind farm is 650 MW and it will be located on the territory of Hlobyne town territorial community.

Currently, the development of a detailed territory plan (DTP) is being completed for the siting, construction, operation and maintenance of the wind farm outside the settlements within the territory of the Hlobyne community.

On January 30, DTEK Renewables experts discussed the progress of the DTP project development together with representatives of the Urban Planning and Architecture Department of the Department of Construction, Urban Planning and Architecture, Housing and Energy of the Poltava Regional State Administration, the Hlobyne Town Territorial Community, and the project organization.

In particular, the meeting reviewed preliminary decisions on the DTP for the construction of DTEK Poltavska WPP and agreed on the design corridors of the wind farm's technological engineering network with the approximate points of installation of wind turbines.

In addition, the meeting agreed on the boundaries of the prospective development of the Hlobyne town territorial community's settlements, taking into account the provisions of the DPT.

In the near future, it is planned to hold public hearings of the urban planning documentation, followed by its review by the architectural and urban planning council under the Department of Construction, Urban Development and Architecture, Housing and Energy of Poltava Regional State Administration. Subsequently, public discussions will be held for this DTP.

ABOUT DTEK

DTEK Group is the largest private investor in the energy sector of Ukraine. The Group employs 55,000 people.

DTEK Group's companies are engaged in coal and natural gas mining, electricity production at wind, solar and thermal power plants, trade energy resources in the Ukrainian and international markets, distribute and supply electricity to consumers, provide energy-efficient services to customers, and develop a network of high-speed charging stations. In accordance with the Strategy 2030, DTEK strives to transform into a more energy-efficient, environmentally friendly and technological business, guided by ESG principles. DTEK is a member of the World Economic Forum's Partnering Against

Corruption Initiative (PACI). Our goal is to achieve carbon neutrality.

Since the beginning of the full-scale invasion, DTEK Group has restored power supply to more than nine million consumers in the regions affected by the hostilities. DTEK Group is 100% owned by SCM Limited. The ultimate beneficiary is Rinat Akhmetov.
